Acme Robotics Annual Report 2025.

Acme Robotics was founded in 2011 in Pune by Meera Iyer and Rohan Das.

The company builds warehouse robots and employs 340 people across three offices.

Financial results.

Revenue for 2025 was 48 million dollars, up 22 percent from 2024.

The net profit margin reached 9 percent, driven by lower component costs.

The board approved a dividend of 0.40 dollars per share.

Risks and outlook.

The main risk is dependence on a single battery supplier located in Taiwan.

Management plans to open a fourth office in Bengaluru in the second quarter of 2026.
